

Customs. Managed.

Declaration Filing

When you're importing or exporting goods, every minute counts, yet customs is often one of the largest bottlenecks in the supply chain. With automated declaration filing supported by Portorium's expert managed services, you can ensure timely delivery of goods at a lower cost.

Why self-file?

- Speed up customs clearance
- Eliminate costly broker fees
- Gain visibility into trade operations
- Automate multi-jurisdiction filing up to 100%
- Save up to 90% of recurring declaration costs annually

Use Case: Saving money on multi-country filing

A food manufacturer was reliant on numerous brokers to process import and export declarations for multiple countries. Upon shipment and again at arrival, goods were delayed for an hour or more while awaiting response from the customs broker, which added significant time and stress in the transport of perishable items.

Results:

- Brought customs in-house
- Automated declarations for 4 import countries and 5 export countries
- Gained broker independence
- Fully supported by managed services; no new FTEs necessary
- After-hours support
- Faster delivery times on perishable goods
- 90% of recurring declaration costs saved annually

How we work

Portorium's holistic approach combines consulting, software, and managed services so you can bring customs in-house, gaining control and visibility while we manage the process from end to end.

Consulting

Portorium's experts assess your trade operations and prioritise automation to achieve your most pressing strategic goals, e.g., optimising your key logistics flows or realising the quickest return on investment. We then define the implementation scope and configure, integrate, and test the software in your environment.

Software

The software is fully up to date with the latest legal and technological changes for worry-free filing. It integrates seamlessly with your ERP via API or SAP plugin and will automatically validate consignment data and sequence and file import and export declarations. The system supports broker management for last-mile filing and provides on-demand reporting.

Managed Services

Portorium's team of customs experts provides standard or 24x7 support to add missing declaration data, resolve ingest errors, check customs system availability, follow up on alerts, investigate issues, and delete/amend/invalidate declarations. You can rest assured that your declarations are complete, compliant, and on time, eliminating border delays.

Coverage

Our solution supports import, export, and/or transit declaration filing in 11 countries, with more on the roadmap. Broker management for last-mile filing extends that reach worldwide, providing a global fast-lane for your goods.
